Wm. Belt, prod. large, extra qual. and beauty one of best new varieties	50	1 00	
Woolverton, late, prod, vig. large, firm, one of Canada's best.....	25	75	5 00

Strawberries should be set in early spring. On large orders our selection, special low prices will be given. To secure good pollenization set two rows of pistillates, two perfects. Those marked with a star have the others near by; those perfect in the blossom may be planted by themselves alone; for matted rows, plant 4 feet by 2 feet. These kinds in heavy type have proven themselves worthy, general planting and most profitable over a wide range of country and on all soils.
